

Capability Statement

Introduction

SLC Rail is a rail consultancy business with nationwide capability, specialising in development and delivery of projects which interface with the railway. We manage a portfolio of rail related projects to a value of £300m. Typically, our clients are local government, train operators and developers.

Our Team

We pride ourselves on being a diverse team of rail professionals who are highly experienced, competent and passionate in leading all stages of projects and programmes. From an initial concept of a requirement, through development and delivery phases, right up to handover and opening day. With specialists from a wide range of industry and technical backgrounds, SLC Rail provide the specialist skills necessary to successfully navigate the technical, operational, political and regulatory requirements of the rail industry to bring clarity and to deliver customer outputs to achieve the desired benefits.

Shaping Rail Strategy

We are experienced in supporting vision for development and growth, through evaluation of economic and societal needs for transport and connectivity. Our team take accountability for schemes and add value through our ability to unlock obstacles, develop rail investment modelling, and solve funding and finance arrangements in the very early stages of a project.

Developing Rail Services

We have a proven technical expertise and holistic understanding of the rail industry which enables us to conceive specifications and develop schemes, optimising outputs for stakeholder support and successful investment. Our dedicated property specialists have detailed knowledge and advise on legislative planning and consents strategies, allowing projects to develop with full appreciation of constraints and future opportunities.

Delivering Rail Projects

Through our multi-disciplined team, we lead engineering design, provide insight into procurement models, engage with industry suppliers and lead delivery of programme design and construction phases. We understand the complexities and interdisciplinary nature of the rail industry and provide the full suite of project management services to efficiently progress delivery through to handover.

Our Approach

Our passion for the industry means we seek to add value through every contribution we make, being unafraid to challenge ourselves and others. Our approach is innovative, open, honest and collaborative – we partner with our clients and build trust-based relationships which ensure the right outcomes are achieved.

Our team is 80 strong, specialising in:
